Career Objective

Having received a diploma in Digital Media and Information Technology specializing in web development while achieving a GPA of 4.0, I am looking to gain more experience. This will allow me to further my career goals and become an accomplished web developer. I am especially interested in developing web applications.

Skills Summary

Web Development

- Proficient with writing HTML, CSS, and Javascript.
- Experience building web applications using JS libraries such as React.
- Working as a part of a team while collaborating remotely using git to complete projects.
- Ability to write well-documented, organized, and reusable code.
- Experience implementing 3rd party APIs into web applications.
- Knowledge in relational databases such as MySQL.
- Familiar with creating WordPress websites that can be easily used by clients.
- Currently researching and working on a project using Next.js.

Design

- Knowledge and experience with the Adobe suite of software.
- Experience with both UI and UX design.

Personal

- Effective time management ensuring projects are completed on time.
- Able to work in a team environment, as a leader or part of the group.
- Experience with working with many people from diverse backgrounds while living overseas.
